**08/07/2025**

**Dear Hiring Team,**

As a BTech in Computer Science graduate from Kerala Technological University with fresh skills, I am thrilled to apply for the Associate – Client Technology role at EY. With a strong background in software development, data analytic, cybersecurity and a desire to address business issues with technology, I am a very good fit with EY's vision of creating innovative solutions for clients.

Throughout my academic path, I gained practical experience in Python, Java, SQL, Data Analysis and its further works with the help of coursework and projects. For example, for my final year project, I created a web application for learning Python using the flutter program, overcoming the purely theoretical traditional approach commonly utilized. These experiences taught me problem-solving, flexibility to new technology, and a sense of how technology enhances business efficiency—skills which I am eager to contribute to EY's Client Technology team.

What I find most thrilling about EY is that it is so engaged in leveraging the latest technologies such as AI, blockchain, and cloud computing to revolutionize clients' operations. I am especially attracted to EY's Tech Connect or partnership with Microsoft and I am sure that my technical inclination, inquisitiveness, and team-oriented nature will enable me to meaningfully contribute to your projects.

As an avid learner with an enthusiasm for innovation, I am prepared to dive into EY's vibrant culture. I would appreciate the chance to explain how my abilities can enhance your team's objectives. Thank you for considering my application—I hope to be able to contribute to EY's vision of a technology-driven future.

**Sincerely,**

**Andria. Fraderick**
